

Logical Framework Matrix Comparison

The Logical Framework Matrix (LogFrame) is a systematic planning tool used extensively in project management, particularly within the development sector. This resource provides a comparative overview of terminologies and frameworks used by various organisations such as CARE, USAID, DANIDA, DfID, CIDA, GTZ, the European Union, FAO, UNDP, NORAD, UNHCR, the World Bank, and AusAID. By aligning project goals, objectives, outcomes, outputs, activities, and inputs, the LogFrame helps structure projects to ensure clarity, accountability, and measurable progress. This comprehensive resource breaks down the different terminologies and approaches these organisations use, clearly understanding how to effectively plan, implement, and evaluate projects. This comparison aids in fostering a unified approach to project management, facilitating better coordination, and enhancing the overall impact of development initiatives.

Ultimate Impact	End Outcomes	Intermediate Outcomes	Outputs	Interventions
Higher Consequence	Specific Problem	Cause	Solution	Process/Inputs
CARE terminology	Program Impact	Project Impact	Effects	Outputs
CARE log frame	Program Goal	Project Final Goal	Intermediate Objectives	Outputs
PC/LogFrame	Goal	Purpose	Outputs	Activities
USAID Results Framework	Strategic Objective	Intermediate Results	Outputs	Activities
USAID Logframe	Final Goal	Strategic Goal/Objective	Intermediate Results	Activities
DANIDA + DfID	Goal	Purpose	Outputs	Activities
CIDA + GTZ	Overall Goal	Project Purpose	Results/Outputs	Activities
European Union	Overall Objective	Project Purpose	Results	Activities
FAO + UNDP + NORAD	Development Objective	Immediate Objectives	Outputs	Activities
UNHCR	Sector Objective	Goal	Project Objective	Outputs
World Bank	Long-term Objectives	Short-term Objectives	Outputs	Activities
AusAID	Scheme Goal	Major Development Objectives	Outputs	Activities

Ultimate Impact (Higher Consequence)

→ Definition: The broad, long-term change or benefit the project aims to achieve. Often aligned with larger organisational or societal objectives.

→ Example: Improve public health and reduce poverty levels.

End Outcomes (Specific Problem)

→ Definition: The specific problem that the project seeks to address, leading to the desired ultimate impact.

→ Example: Reduce the incidence of waterborne diseases in rural areas.

Intermediate Outcomes (Cause)

- Definition: The intermediate changes or results that directly result from the project's activities and outputs, addressing the cause of the problem.
- Example: Increase access to clean drinking water through infrastructure improvements.

Outputs (Solution)

- Definition: The direct products or services the project delivers, representing the solutions to the specific problem.
- Example: Construction of new wells and water purification systems.

Interventions (Process/Inputs)

- Definition: The specific activities, processes, and inputs required to produce the outputs and achieve the outcomes.
- Example: Training local workers, procuring materials, and constructing wells.

Comparison of Terminologies Across Organizations**- CARE Terminology:**

- Program Impact: The long-term change resulting from the program.
- Project Impact: The specific impact of the project within the program.
- Effects: The changes resulting from the project's outputs.
- Outputs: The tangible products or services delivered.
- Activities: The tasks undertaken to produce outputs.
- Inputs: The resources required for activities.

- CARE Logframe:

- Program Goal: The overarching aim of the program.
- Project Final Goal: The ultimate goal of the project.
- Intermediate Objectives: The specific objectives bridge the outputs and final goal.
- Outputs: The immediate results of project activities.
- Activities: The actions taken to achieve outputs.
- Inputs: The resources required for activities.

- PC/LogFrame:

- Goal: The ultimate aim of the project.
- Purpose: The specific objective to be achieved.
- Outputs: The direct results of activities.
- Activities: The tasks undertaken to produce outputs.

- USAID Results Framework:

- Strategic Objective: The long-term objective aligned with the program.
- Intermediate Results: The intermediate changes leading to the strategic objective.
- Outputs: The immediate results of activities.
- Activities: The actions taken to achieve outputs.
- Inputs: The resources required for activities.

- USAID Logframe:

- Final Goal: The ultimate aim of the project.
- Strategic Goal/Objective: The intermediate goal leading to the final goal.

- Intermediate Results: The specific results contributing to the strategic goal.
- Activities: The tasks undertaken to achieve intermediate results.
- 202E: Specific inputs or resources required.

- DANIDA + Dfid:

- Goal: The ultimate aim of the project.
- Purpose: The specific objective to be achieved.
- Outputs: The direct results of activities.
- Activities: The tasks undertaken to produce outputs.

- CIDA + GTZ:

- Overall Goal: The overarching aim of the project.
- Project Purpose: The specific objective to be achieved.
- Results/Outputs: The immediate results of activities.
- Activities: The tasks undertaken to achieve outputs.
- Inputs: The resources required for activities.

- European Union:

- Overall Objective: The broad aim of the project.
- Project Purpose: The specific objective to be achieved.
- Results: The immediate results of activities.
- Activities: The tasks undertaken to achieve outputs.

- FAO + UNDP + NORAD:

- Development Objective: The long-term objective of the project.
- Immediate Objectives: The specific changes or results to be achieved.
- Outputs: The direct results of activities.
- Activities: The tasks undertaken to produce outputs.
- Inputs: The resources required for activities.

- UNHCR:

- Sector Objective: The overarching aim within a specific sector.
- Goal: The ultimate aim of the project.
- Project Objective: The specific objective to be achieved.
- Outputs: The direct results of activities.
- Activities: The tasks undertaken to produce outputs.
- Input/Resources: The resources required for activities.

- World Bank:

- Long-term Objectives: The broad, long-term aims of the project.
- Short-term Objectives: The specific, immediate aims to be achieved.
- Outputs: The direct results of activities.
- Activities: The tasks undertaken to produce outputs.
- Inputs: The resources required for activities.

- AusAID:

- Scheme Goal: The overarching aim of the project.
- Major Development Objectives: The specific, significant objectives to be achieved.
- Outputs: The direct results of activities.
- Activities: The tasks undertaken to produce outputs.
